

## THERE IS GOOD NEWS FOR YOUR WINTER HOLIDAY

Dear Guest,  
to ensure a safe and relaxed stay at Cosmea  
the "Green Pass" is required at check-in.

\*

In the last few months we have put a lot of thought and effort into making your holiday safe and carefree. On the right side you will find the measures we have introduced in addition to the usual cleanliness and hygiene.

\*

The "Achiet" wellness zone can be used again and also the buffet is offered for breakfast and dinner as usual.

\*

...And of course the lift operators and the Dolomiti Superski have also worked out the best possible concept for your safety on the slopes: Guests with a valid Green Pass (EU Covid-19 certificate) are permitted to use cable cars and lifts. Children under the age of 12 are exempt from this rule.

When entering enclosed lift facilities such as gondolas or cable cars, a surgical or FFP2 mask must be worn.

All guests must keep a safe 1 meter distance to others.

For your safety and convenience, purchase your ski pass online and avoid long queuing times.

Sufficient ventilation and disinfection of the lift facilities will be ensured.

All gondolas and cable cars are to be filled to max 80% occupancy; chairlifts may be 100% occupied or 80% if they have weather protection bubble.

The same safety regulations apply in the ski huts as in the restaurants

\*

Last but not least...

In collaboration with Val Gardena Active, we have prepared many alternative leisure programs such as snowshoeing, night sledging or theme walks.

We would be very pleased to welcome you  
to Cosmea this winter  
Claudia und Oskar ☺

Your safety is very  
important to us

We have introduced even  
more intensive hygiene  
measures than usual to  
make you feel "at home"  
with us.

—

Before your arrival the room  
will be disinfected with  
OZON.

—

You will find disinfectant  
dispensers at all entrances  
to the hotel and on the  
individual floors.

—

The laundry is washed with  
specific detergents  
and at minimum 90 degrees.

—

For your safety, the tables  
have been distanced so that  
the prescribed distance can  
be maintained at all times.

The whole staff  
is vaccinated
